**Abstract:** This research project focuses on the development of entrepreneurship textbooks tailored to support the vision of Universitas Jambi (UNJA) and enhance creativity among Civics Study students. The objective is to inspire innovators by integrating entrepreneurial principles into the Civics curriculum, providing students with practical knowledge and skills to foster creativity. The study employs a comprehensive approach, combining curriculum analysis, textbook development, and program implementation. Through this initiative, the research aims to contribute to UNJA's vision of producing socially responsible entrepreneurs capable of driving positive change in their communities.

---

**INTRODUCTION**

In response to the evolving landscape of education and the dynamic needs of the workforce, Universitas Jambi (UNJA) is committed to fostering an environment that not only imparts academic knowledge but also cultivates creativity and entrepreneurial acumen among its students. This research project, titled "Entrepreneurial Creativity Unleashed: Inspiring Innovators among UNJA Civics Study Students through Entrepreneurship Textbook Development," aligns with UNJA's vision to produce graduates who are not just academically proficient but also equipped with the skills and mindset to drive positive change in their communities.

As a crucial component of UNJA's academic landscape, the Civics Study program provides a unique platform to instill values of citizenship, social responsibility, and innovation. Recognizing the need to integrate entrepreneurial principles into this curriculum, this research embarks on the development of

tailored entrepreneurship textbooks. The goal is to empower Civics Study students with practical knowledge, skills, and a mindset that fosters creativity and innovation.

The Civics Study program at UNJA serves as an ideal context to nurture socially responsible entrepreneurs. By infusing entrepreneurial education into the Civics curriculum, this initiative aims to go beyond theoretical knowledge, providing students with the tools to translate ideas into action, solve real-world problems, and contribute meaningfully to societal development.

This introduction sets the stage for an exploration into the development of entrepreneurship textbooks that will serve as catalysts for inspiring innovators among UNJA Civics Study students. Through a multi-faceted approach encompassing curriculum analysis, textbook development, and program implementation, this research aspires to contribute to the realization of UNJA's educational vision and the cultivation of a new generation of entrepreneurial leaders capable of unleashing their creative potential for the greater good.

## **METHOD**

The process of unleashing entrepreneurial creativity among UNJA Civics Study students through the development of entrepreneurship textbooks is a multifaceted and collaborative endeavor. It commences with a meticulous analysis of the existing Civics Study curriculum, where the research team scrutinizes the structure and content to identify strategic entry points for the infusion of entrepreneurial principles. This initial phase ensures a synergistic alignment with UNJA's vision for producing innovative and socially responsible graduates.

Following the curriculum analysis, the process advances to stakeholder consultation, involving educators, students, and industry experts. This collaborative effort aims to gather diverse perspectives and insights. Faculty input provides academic context, student opinions offer a nuanced understanding of aspirations and expectations, and industry expertise contributes real-world relevance. These consultations form a foundation for the design of entrepreneurship textbooks that resonate with the specific needs and dynamics of the Civics Study program.

The subsequent phase centers on textbook design and content development. Leveraging the insights gained from the curriculum analysis and stakeholder consultations, the research team creates modules that not only impart fundamental entrepreneurial concepts but also emphasize their practical application within the civic realm. The design incorporates interactive elements, case studies, and real-

world examples, fostering an engaging and dynamic learning environment that stimulates students' creativity and innovation.

A pivotal aspect of the process involves the pilot implementation of the developed textbooks within select Civics Study classrooms. This real-world testing ground allows for the collection of valuable feedback from both students and educators. Through surveys, focus group discussions, and assessments, the research team gathers insights into the textbooks' effectiveness, identifying strengths, areas for improvement, and the overall impact on students' entrepreneurial mindset and creativity.

The process maintains a commitment to continuous refinement and evaluation. Iterative improvements are made to the textbooks based on the feedback received during the pilot phase, ensuring their ongoing relevance and effectiveness. A robust evaluation framework is applied to assess the long-term impact of entrepreneurship education on students' creativity and innovation, contributing to a dynamic and adaptive framework that aligns with UNJA's overarching vision for holistic education.

This holistic process not only aims to develop entrepreneurship textbooks but also strives to establish a transformative educational model. By inspiring innovators among UNJA Civics Study students, the project seeks to instill a lasting entrepreneurial mindset that transcends traditional academic boundaries, fostering a new generation of socially conscious and innovative leaders.

#### Curriculum Analysis:

The research methodology begins with a thorough analysis of the existing Civics Study curriculum at Universitas Jambi (UNJA). This analysis aims to identify opportunities for the seamless integration of entrepreneurial principles into the curriculum, ensuring alignment with UNJA's vision and goals. By understanding the current structure and content of the Civics Study program, the research team can strategically pinpoint areas where entrepreneurship education can enhance students' creativity and innovation.

#### Stakeholder Consultation:

The development of entrepreneurship textbooks involves collaborative efforts with stakeholders, including educators, students, and industry experts. Consultations with Civics Study faculty provide insights into the specific needs and expectations of the program. Student input is sought to understand their perspectives on entrepreneurship and creativity, ensuring that the textbooks resonate with their

interests and aspirations. Engaging with industry experts contributes real-world insights, aligning the textbooks with the practical demands of entrepreneurial endeavors.

#### **Textbook Design and Content Development:**

Based on the curriculum analysis and stakeholder consultations, the research team proceeds to design entrepreneurship textbooks tailored to UNJA's Civics Study program. The content development phase involves creating modules that not only cover fundamental entrepreneurial concepts but also emphasize the application of these principles in a civic context. The design incorporates interactive elements, case studies, and real-world examples to engage students actively and stimulate their creativity.

#### **Pilot Implementation and Feedback:**

To validate the effectiveness of the developed textbooks, a pilot implementation is conducted within select Civics Study classrooms. This phase allows for the collection of valuable feedback from both students and educators. Feedback is systematically gathered through surveys, focus group discussions, and assessments, enabling the research team to identify strengths, areas for improvement, and overall impact on students' entrepreneurial mindset and creativity.

#### **Continuous Refinement and Evaluation:**

The research methodology incorporates a continuous refinement process based on the feedback received during the pilot implementation. Iterative improvements are made to the textbooks to enhance their effectiveness and relevance. Additionally, a robust evaluation framework is applied to assess the long-term impact of the entrepreneurship education on students' creativity, innovation, and their ability to integrate entrepreneurial principles into their civic endeavors.

By adopting this comprehensive methodology, the research aims to not only develop entrepreneurship textbooks but also establish a dynamic and adaptive framework for fostering entrepreneurial creativity among UNJA Civics Study students, aligning with UNJA's overarching vision for holistic education.

## **RESULTS**

The implementation of entrepreneurship textbooks within the UNJA Civics Study program yielded noteworthy results. Quantitative assessments indicated a significant increase in students' understanding of entrepreneurial concepts and their ability to apply these principles within the civic

context. Formative assessments revealed heightened engagement, with students actively participating in entrepreneurial projects and demonstrating an enhanced creative mindset. Feedback from educators highlighted the positive impact of the textbooks on students' ability to integrate entrepreneurial thinking into their civic endeavors.

## **DISCUSSION**

The observed results sparked discussions on the transformative potential of entrepreneurship education within the Civics Study program. The integration of entrepreneurial principles not only enhanced students' knowledge but also fostered a culture of innovation and social responsibility. The positive changes in students' attitudes, as evidenced by increased engagement and project participation, underscored the potential of entrepreneurship education to inspire innovators among Civics Study students. Discussions also revolved around the role of such initiatives in nurturing a holistic approach to education, aligning with UNJA's vision for producing well-rounded and socially conscious graduates.

Moreover, discussions emphasized the importance of adaptability in entrepreneurship education, recognizing that the entrepreneurial mindset is dynamic and evolves over time. The textbooks' effectiveness in fostering creativity and innovation became apparent, with students demonstrating an increased ability to approach civic challenges with an entrepreneurial perspective. The interdisciplinary nature of the content encouraged students to explore innovative solutions to real-world problems, contributing to a more vibrant and forward-thinking academic environment.

## **CONCLUSION**

In conclusion, the research project on "Entrepreneurial Creativity Unleashed: Inspiring Innovators among UNJA Civics Study Students through Entrepreneurship Textbook Development" has successfully demonstrated the positive impact of integrating entrepreneurial education into the Civics Study program. The developed textbooks, coupled with a dynamic curriculum, have inspired a new generation of innovators equipped with both civic awareness and entrepreneurial acumen. The observed changes in students' knowledge, attitudes, and project engagement validate the effectiveness of this interdisciplinary approach in cultivating a holistic and innovative mindset.

As the project concludes, it paves the way for the continued evolution of entrepreneurship education within the UNJA Civics Study program. The discussions and results generated by this initiative contribute to ongoing dialogues on the transformative potential of entrepreneurship education in

higher education settings. By inspiring innovators among Civics Study students, UNJA continues to foster a culture of creativity, social responsibility, and entrepreneurship, aligning with its vision for producing graduates who are not only academically proficient but also poised to drive positive change in their communities.
