

OPPORTUNITIES CREATED FOR TODAY'S ENTREPRENEURS IN ZAAMIN DISTRICT

Shuhrat Kh. Nomozov

Entrepreneur Jizzakh, Uzbekistan

ABSTRACT: - This article discusses the opportunities created for today's entrepreneurs in Zaamin district. The goal is to increase the number of entrepreneurs, and create new jobs. This year, we will continue to create more favorable conditions for the development of entrepreneurship and small business, and will continue to help entrepreneurs to cope with the shortage of working capital during the pandemic. The establishment of Public Councils for Entrepreneurship Support at these receptions has increased the importance of preventing red tape and eliminating bureaucratic barriers in the consideration of applications from entrepreneurs.

KEYWORDS: opportunities, entrepreneurs, Zaamin district, favorable conditions, development of entrepreneurship, small business, shortage of working, capital, consideration of applications.

INTRODUCTION

People who are enterprising, active and trying to improve the financial situation of themselves and others are called "entrepreneurs". However, in recent years, the word "entrepreneur" has meant not only narrow-minded, but also world-class businessmen who are able to bring Uzbek products to the world market, engage in a

wide range of activities and play an important role in public life. Entrepreneurship has reached a new level in the new Uzbekistan.

If the master of his craft is given the opportunity to work safely and freely, his/her activity will continue to expand. In recent years, along with such conditions, a wide range of opportunities and great conditions for the development of the industry have

"OPPORTUNITIES CREATED FOR TODAY'S ENTREPRENEURS IN ZAAMIN DISTRICT"

been created in our country. As a result, it is no secret that the number of people interested in “entrepreneurship” is growing, including women and young people, and most importantly, today large and small organizations are inviting entrepreneurs to cooperate, listen to their problems and do the right thing.

THE MAIN FINDINGS AND RESULTS

In the process of reforms, a number of important measures have been taken to create the necessary conditions for the development of business entities. In particular, as a result of the reduction of value added tax from 20% to 15%, businesses will have 2 trillion soms.

We all know that today, under the leadership of President Shavkat Miromovich Mirziyoyev, extensive work is being carried out in our country on “Development of small business and private entrepreneurship”.

In particular, “Entrepreneurship development is an important direction of economic policy of our country”.

In recent years, the head of state has adopted more than 50 decrees and resolutions in the field of entrepreneurship, many changes have been made to existing legislation, and the regulatory framework is being re-formed. It is noteworthy that the procedure for obtaining business permits has been significantly simplified, and inspections of financial and economic activities of business entities have been sharply reduced.

All reforms in the field of legislation are becoming more important during the visits of the President to the regions with well-thought-out initiatives to further improve the support of entrepreneurship, eliminate various bureaucratic hurdles and obstacles, as well as the tasks and instructions.

The Decree of the President of the Republic of Uzbekistan dated May 14, 2019 “On measures to radically improve the system of support and protection of entrepreneurship” and the establishment of receptions for consideration of appeals of entrepreneurs by the Prime Minister of Uzbekistan created an important basis for business development and support.

At the present days, in Jizzakh region, as well as in Zaamin district, the regional, city and district receptions for consideration of appeals of the Prime Minister of Entrepreneurs are fully operational.

The establishment of Public Councils for Entrepreneurship Support at these receptions has increased the importance of preventing red tape and eliminating bureaucratic barriers in the consideration of applications from entrepreneurs.

In order to ensure the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan № 351 of June 5, 2017, the Jizzakh branch of the Republican Center for Basic Entrepreneurship Training held training courses in Zaamin district on February 10-14 this year.

According to the Resolution of the Cabinet of Ministers of the Republic of Uzbekistan №698 of 09.11.2020, certain plans have been developed for the Complex Socio-Economic Development of Zaamin District of Jizzakh Region in 2020-2022. Development of industry, agriculture and services in Zaamin district of Jizzakh region, increase in industrial and agricultural production, provision of modern household, trade, transport, medical, tourism and other services to the population, in order to create new jobs, efficient use of existing resources, further improve engineering and communication and social infrastructure, the Cabinet of Ministers decides:

“OPPORTUNITIES CREATED FOR TODAY’S ENTREPRENEURS IN ZAAMIN DISTRICT”

The following should be identified as priorities for the implementation of the Program:

- further socio-economic development of Zamin district, increase of incomes and living standards of the population, in particular, women, youth and low-income citizens through employment;
- increase the volume of industrial production through the creation of new production facilities, modernization of existing production facilities;
- creation of favorable conditions for wide involvement of the population in entrepreneurship and further development of family business;
- development of engineering and communication and social infrastructure, including the reconstruction and reconstruction of internal roads, social facilities, increasing the level of access to clean drinking water, natural gas, electricity;
- improving the condition of social facilities, repairing buildings, landscaping, strengthening the material and technical base, radically improving the quality of services provided to the population.
- Resolution of the Cabinet of Ministers of the Republic of Uzbekistan № 936 of 21.11.2019 on Measures to Create Favorable Conditions for the Development of Entrepreneurship and Investment Potential of Jizzakh Region.
- In order to develop high-tech, scientific-technological and innovative entrepreneurship in Jizzakh region, to create additional conditions for active investment, to concentrate new competitive industries in separate areas, to increase employment and

welfare, the Cabinet of Ministers decides:

- The following are the main tasks and activities of the technoparks:
- attracting local and foreign investors interested in organizing the production of competitive import-substituting products;
- creation of favorable conditions for participants of technoparks, providing them with the necessary high-tech infrastructure;
- providing financial, marketing, legal and other services to the participants of technoparks.

Small business and private entrepreneurship are among the growth points of the economy. We have all seen and witnessed their contribution to the stability of the economy during the difficult tests of our people last year. Therefore, in spite of the difficult tests in 2020, under the leadership of the head of our state, all urgent measures have been taken to support business, sufficient resources have been allocated and the necessary conditions have been created. The goal is to increase the number of entrepreneurs, create jobs and create new jobs. This year, we will continue to create more favorable conditions for the development of entrepreneurship and small business, and will continue to help entrepreneurs to cope with the shortage of working capital during the pandemic. In his address to the Oliy Majlis, the head of state touched upon this issue, noting that 6 trillion soms of soft loans will be allocated this year within the framework of family business programs to continue the work on financial support of entrepreneurship. The government has said it will allocate an additional \$ 100 million to expand a rural entrepreneurship program launched in partnership with the World Bank. In order to

“OPPORTUNITIES CREATED FOR TODAY’S ENTREPRENEURS IN ZAMIN DISTRICT”

create a level playing field in the market and to provide honest support to honest entrepreneurs working on the basis of modern technologies, the government plans to introduce mechanisms to reduce the “hidden economy”. It is noteworthy that measures are being taken to eliminate barriers and improve outdated procedures that do not meet modern requirements. This work has laid a solid foundation for the liberalization of the licensing and permitting system and the beginning of a new phase of institutional reform. However, the current period requires a radical improvement of licensing and permitting procedures and the creation of more favorable conditions for business entities through the elimination of bureaucratic barriers. Otherwise, due to excessive bureaucracy and other obstacles, entrepreneurial activity will not develop, which will have a negative impact on economic growth, there will be various abuses, excessive pressure. According to the petition, the abolition of 105 licenses and permits and the simplification of procedures for 115 will open the door for them to start and run a business in certain activities to make it easier for entrepreneurs. The draft law “On licensing, permitting and notification procedures”, introduced by the Government, aimed at implementing this initiative, was considered in the first reading at a recent session of the Legislative Chamber of the Oliy Majlis.

CONCLUSION

In conclusion, the main purpose of this document is to regulate the licensing of certain activities, permits and notifications in the field of business. The adoption of the bill will radically improve licensing and permitting procedures, and most importantly, will further improve the business and investment climate in the country.
